

Annual Transparency Record

Stroke Service Tracker (SST)

Reporting Year: 2024

Dataset Version: SST_2024_v1.0

Data Extract Date: 08-SEP-2026

1. Purpose

This Annual Transparency Record (ATR) documents the Stroke Service Tracker (SST) dataset used for the 2024 reporting cycle.

The ATR provides:

- Identification of the dataset version
- Traceability of reported data
- Reproducibility through identification of the specific dataset version used

2. Dataset Version

A dataset version (SST_2024_v1.0) was generated from the SST platform (RedCap Capital Region of Denmark) on 08-SEP-2026. This ATR documents the dataset at the time of extraction.

The dataset:

- Reflects the data available at the time of extraction
- Is generated following validation of submitted data and final review by National Coordinators
- Is not modified after release

For reporting purposes, dataset versions are generated and archived. Each ATR refers to a specific dataset version and must be interpreted in relation to that version.

If updates occur after release, a new dataset version and ATR (e.g. SST_YYYY_v1.x) are generated and recorded in the ATR version history (<https://strokeactionplan.org/>).

Dataset location: Stored on a secure institutional server with restricted access.

3. Participation

- **Reporting nations:** 49
- **Total SAP-E nations eligible to report:** 52

- **Participating nations:** Albania, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Catalonia, Croatia, Cyprus, Czech Republic, Denmark, England, Estonia, Finland, France, Georgia, Germany, Greece, Hungary, Iceland, Israel, Italy, Kosovo, Kyrgystan, Latvia, Lithuania, Malta, Montenegro, North Macedonia, Northern Ireland, Norway, Poland, Portugal, Republic of Ireland, Republic of Moldova, Romania, Scotland, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, The Netherlands, Turkey, Ukraine, Wales

4. Version History

Dataset version	Release date	Description
SST_2024_v1.0	08-SEP-2026	Initial release
